WHO WE ARE

AB-FABIA SERVICE LIMITED is an indigenous Nigerian integrated engineering, procurement, construction and energy-services company with capabilities spanning EPC delivery, oilfield services, drilling fluids, technical product supply, civil and infrastructure works, marine services and surveying.

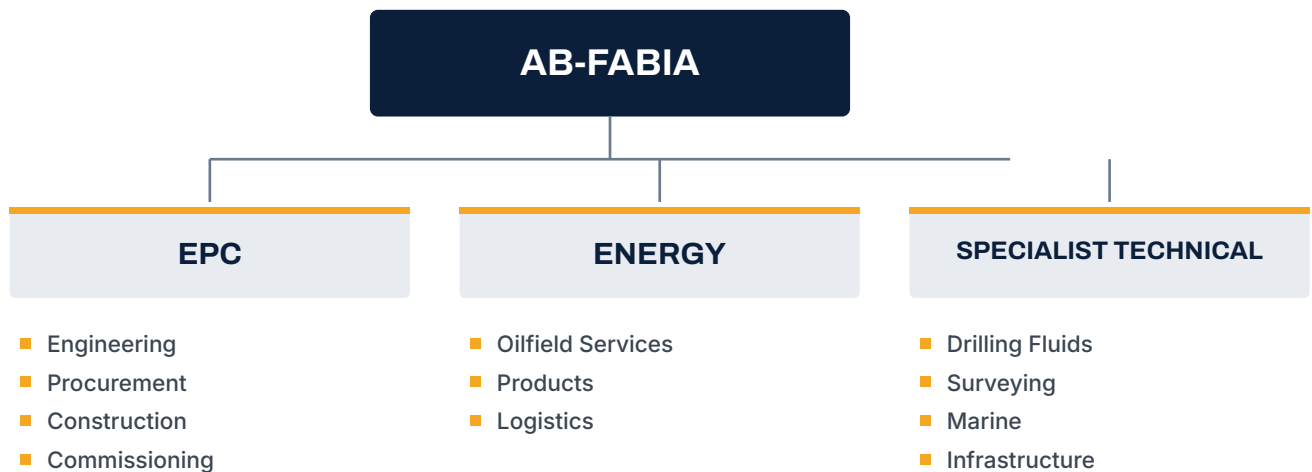

The company has developed from a specialist foundation in drilling-chemical procurement and oilfield technical support into a broader integrated delivery organization.

AB-FABIA combines technical expertise, procurement capability, project execution, field operations and specialist energy services to support clients across demanding industrial and infrastructure environments.

ONE ORGANIZATION

MULTIPLE TECHNICAL CAPABILITIES

INTEGRATED DELIVERY

Integrated capability. Specialist expertise. Practical delivery.

OUR STORY

FROM SPECIALIST EXPERTISE TO INTEGRATED DELIVERY

1999

SPECIALIST PROCUREMENT FOUNDATION

AB-FABIA's roots developed through drilling-chemical procurement and supply, including specialist support to oilfield operations, trading as AB-Fabia Services.

2002

FORMAL INCORPORATION

AB-FABIA SERVICE LIMITED was formally incorporated in Nigeria.

DEVELOPMENT

EXPANDING TECHNICAL DEPTH

The company developed further capability in drilling fluids, mud engineering, technical chemical supply, logistics and associated field support.

CAPABILITY INTEGRATION

ENGINEERING & INFRASTRUCTURE

The organization expanded into broader engineering, construction, infrastructure, marine and surveying capabilities.

INTEGRATION

BROADER PROFESSIONAL CAPABILITY

The capabilities and professional experience associated with the former 1st Support Services organization became part of AB-FABIA's broader corporate capability.

TODAY

INTEGRATED EPC & ENERGY SERVICES

AB-FABIA brings together engineering, procurement, construction, energy services and specialist technical capability within one expanding organization.

OUR CAPABILITIES

AB-FABIA's capability is organized around integrated delivery rather than a flat list of disconnected services.

01 ENGINEERING & EPC

Concept-to-commissioning technical delivery.

- Engineering & Design
- Procurement
- Project Management
- Construction
- Fabrication
- Installation
- Commissioning
- Operations & Maintenance

02 ENERGY & OILFIELD SERVICES

Specialist fluids, products and field support.

- Drilling Fluids
- Mud Engineering
- Drilling / Completion / Workover Fluid Support
- Technical Chemical Supply
- Fluid Facilities
- Field Technical Support
- Oilfield Logistics

03 CIVIL & INFRASTRUCTURE

Land-based construction and public infrastructure.

- Earthworks
- Roads
- Drainage
- Buildings
- Bridges
- Structural Works
- Industrial Facilities
- Water Infrastructure

04 MARINE & WATERWAYS

Dredging and marine environment works.

- Dredging
- Piling
- Reclamation
- Canalization
- Shore Protection
- Marine Structures
- Hydrological Services

05 SURVEYING & GEOMATICS

Field information for planning and execution.

- Topographic Surveying
- Hydrographic Surveying
- Route Surveying
- Positioning
- Related Field Survey Services

ENERGY & OILFIELD SERVICES

AB-FABIA combines specialist oilfield knowledge with procurement, technical support, logistics and field execution capability.

DRILLING FLUIDS & MUD ENGINEERING

Fluid formulation, technical support, mud-engineering services and field operations.

CHEMICAL SUPPLY

Drilling, completion and workover chemical products supported by technical knowledge of their application.

FLUID FACILITIES

Mud and bulk facilities, storage, mixing, filtration and related field-support infrastructure where applicable.

TECHNICAL FIELD SUPPORT

Practical technical support for demanding drilling and oilfield environments.

LOGISTICS & SUPPLY

Procurement, materials coordination, storage and operational logistics.

SUPPORTING FACILITIES

Supporting infrastructure includes a mud and bulk plant at Onne, a mud laboratory with field kits and units, warehouses in Port Harcourt and associated materials-handling equipment.

Specialist technical knowledge supported by practical field capability.

ENGINEERING, PROCUREMENT & CONSTRUCTION

AB-FABIA integrates engineering, procurement and project execution to provide clients with coordinated delivery from concept and planning through construction, commissioning and operational support.

ENGINEERING

- Civil
- Structural
- Mechanical
- Chemical / Process
- Project Engineering
- Technical Planning

PROCUREMENT

- Materials sourcing
- Vendor coordination
- Supply-chain management
- Technical procurement
- Logistics coordination

CONSTRUCTION

- Site development
- Civil works
- Structural works
- Facilities
- Industrial construction
- Fabrication
- Installation

PROJECT DELIVERY

- Planning
- Coordination
- Supervision
- Quality control
- HSE oversight
- Commissioning
- Handover

Engineering decisions, procurement discipline and field execution working as one delivery system.

CIVIL, INFRASTRUCTURE & MARINE

LAND-BASED, INDUSTRIAL AND MARINE ENVIRONMENTS

CIVIL & INFRASTRUCTURE

- Earthworks
- Roads
- Drainage
- Water systems
- Buildings
- Bridges
- Industrial facilities
- Structural works

CAPABILITY FAMILY 03

MARINE & WATERWAYS

- Dredging
- Piling
- Reclamation
- Canalization
- Sand stockpiling
- Shore protection
- Jetties
- Marine structures
- Hydrological services

CAPABILITY FAMILY 04

The capability developed through the integrated technical organization allows AB-FABIA to work across land-based, industrial and marine environments.

SURVEYING & GEOMATICS

Surveying supports AB-FABIA's engineering, infrastructure, marine and construction activities by providing field information required for planning, design, positioning and execution.

CURRENT ACTIVE SERVICE LINE

CAPABILITIES

- Topographic Survey
- Hydrographic Survey
- Route Survey
- Positioning
- Field Data Collection
- Engineering Survey Support

APPLICATIONS

- Infrastructure
- Roads
- Marine Works
- Construction
- Site Development
- Engineering Planning

Field information that connects planning, design and execution.

DRILLING FLUIDS & TECHNICAL PRODUCTS

One of AB-FABIA's major specialist strengths is its technical depth in drilling, completion and workover fluid systems.

PRODUCT FAMILIES

Weighting Agents

Viscosifiers & Rheology Modifiers

Fluid-Loss Control Materials

Lubricants

Shale / Formation Control

Lost-Circulation Materials

Biocides

Corrosion Inhibitors

Defoamers

Brines & Salts

Drill-In Fluid Systems

Completion & Workover Products

Specialty Chemicals

TECHNICAL DOCUMENTATION

Detailed product specifications, technical data and application information are available through AB-FABIA's technical and product documentation.

Specialist strength within an integrated EPC and energy-services company.

HOW WE DELIVER

- 
- 01 UNDERSTAND**
Client requirement, operating environment and delivery objectives.
 - 02 ENGINEER**
Technical assessment, planning, design and solution development.
 - 03 PROCURE**
Materials, equipment, specialist products and supply-chain coordination.
 - 04 EXECUTE**
Construction, installation, field operations and technical delivery.
 - 05 CONTROL**
Project supervision, HSE, QA/QC and execution monitoring.
 - 06 COMMISSION**
Testing, completion, handover and technical close-out.
 - 07 SUPPORT**
Operations, maintenance and technical support where required.

AB-FABIA's integrated model reduces fragmentation between technical planning, procurement and field execution.

HSE, QUALITY & FIELD ASSURANCE

Safe, controlled and technically responsible execution is integral to AB-FABIA project delivery.

HSE

- Site safety
- Risk awareness
- Environmental responsibility
- Field supervision
- Operational discipline

QUALITY

- Technical compliance
- Inspection
- QA/QC oversight
- Specification control
- Field verification
- Supervision

FIELD ASSURANCE

"Field teams maintain active project supervision and execution oversight."

CERTIFICATIONS & REGISTRATIONS

Verified certifications and registrations are published as they are issued.

The company operates to defined internal standards for safety, quality and field verification, reinforced by continuous training and supervision on every engagement.

OUR PEOPLE

COMPANY CAPABILITY FIRST. PEOPLE AS EVIDENCE OF THAT CAPABILITY.

AB-FABIA's capability is built around an integrated team of experienced professionals whose combined technical, commercial and operational expertise supports project delivery.

ABI
Ayini Basil Iyalla

MANAGING DIRECTOR / CEO

Leads the company he established from a specialist drilling-chemical supply base in 1999. More than two decades of procurement and supply experience across oilfield operations, with an academic and chartered management background.

ETA
Edward Tamunobelem Alabo

GENERAL MANAGER

Drilling-fluids professional with more than two decades of senior mud-engineering experience, including roles with major international oilfield service companies. Holds degrees in industrial chemistry and project management.

DG
David Gelsthorpe

EXECUTIVE DIRECTOR, FINANCE / ADMIN

Chartered accountant with more than twenty years of finance and taxation experience across the oil and gas, construction and logistics industries, serving at management and board levels.

JT
Joyce Tawiyah

CONSULTING PARTNER

Trained drilling-fluids professional specializing in drilling and completion fluids, oilfield chemical testing and operational reliability in the Nigerian energy sector.

DOO
Dike Orji Okiwe

OPERATIONS MANAGER

Engineer with more than twenty years of experience across oil production, marine operations engineering, construction and project management, with qualifications in chemical, petroleum and logistics engineering.

TECHNICAL & PROFESSIONAL STRENGTH

Operations & Logistics

HSE / QA / QC

The organization's current professional capability also incorporates relevant technical experience developed through the former 1st Support Services organization following its integration into AB-FABIA.

SELECTED DELIVERY EXPERIENCE

AB-FABIA's experience spans engineering, construction, oilfield technical services, chemical supply, infrastructure and related specialist delivery.

A EPC / CONSTRUCTION

Staff Quarters, Oshie Oilfield

OANDO (FORMERLY NIGERIAN AGIP) · OSHIE OILFIELD

Design and construction of staff quarters, including civil and structural works, building services and site development to support field operations.

■ OUTCOME

Quality staff accommodation delivered on target and on budget.

B DRILLING / MUD ENGINEERING

Idu 1 & Idu 6, Mud Engineering Support

NAOC, IN PARTNERSHIP WITH BAROID DRILLING FLUIDS · JOINT MUD ENGINEERING SUPPORT (70:30) · IDU OILFIELD, BAYELSA STATE · 2003 - 2005
 Joint mud engineering support with Baroid Drilling Fluids for the drilling and completion of the Idu 1 and Idu 6 wells.

■ OUTCOME

Both wells drilled and completed to production readiness.

C CHEMICAL SUPPLY / TECHNICAL SUPPORT

Drilling Chemicals Supply

NIGERIAN AGIP OIL COMPANY (NAOC) · NIGER DELTA · SINCE 1999

Major single-source procurement and supply of drilling chemicals, sustained as a trusted relationship over more than two decades.

■ OUTCOME

A supply partnership maintained with one of Nigeria's leading operators since 1999.

Drilling Fluid Products Supply

GEO-FLUIDS LIMITED, SERVING TOTAL E&P OPERATIONS · SUPPLY RELATIONSHIP THROUGH GEO-FLUIDS LIMITED · TOTAL E&P OPERATIONS · 2000 - 2005

Supplied Geo-Fluids Limited, an indigenous mud engineering service company, with the products required for its operations at Total E&P.

■ OUTCOME

Established AB-FABIA among the foremost indigenous mud engineering supply companies of the period.

D INFRASTRUCTURE / MARINE

Mbiama / Akinima Road

RIVERS STATE GOVERNMENT · MBIAMA / AKINIMA, RIVERS STATE

Road construction works, including earthworks, drainage, surfacing and quality control, improving access and connectivity for communities and commerce.

■ OUTCOME

Durable road infrastructure delivered for the Rivers State Government.

CLIENTS & INDUSTRY RELATIONSHIPS

AB-FABIA's experience has developed through relationships across oil and gas, industrial, public-sector and infrastructure environments.

DIRECT CLIENTS

■ Rivers State Government	Public-sector infrastructure
■ Nigerian Agip Oil Company (NAOC)	Drilling chemical supply since 1999
■ Oando	Construction, Oshie Oilfield
■ Geo-Fluids Limited	Drilling fluid products supply
■ Nubian Nigeria Limited	Oil and gas services

SUPPLY / TECHNICAL RELATIONSHIP

■ Total E&P	Served through supply to Geo-Fluids Limited (2000 - 2005)
------------------------	---

CONTRACTOR / PARTNER RELATIONSHIP

■ Baroid Drilling Fluids	Joint mud engineering support, Idu Oilfield (2003 - 2005)
---------------------------------	---

Relationships are stated as direct or through intermediaries exactly as the delivery record supports.

WHY AB-FABIA

01

PROVEN INDUSTRY FOUNDATION

More than two decades of development and experience across specialist energy and engineering environments.

02

INTEGRATED DELIVERY

Engineering, procurement, construction, technical services and project execution connected within one organization.

03

SPECIALIST DRILLING-FLUID EXPERTISE

Deep technical capability supported by a broad drilling, completion and workover product portfolio.

04

BROAD ENGINEERING CAPABILITY

Civil, structural, mechanical, infrastructure, marine and surveying competence.

05

PRACTICAL FIELD EXPERIENCE

Technical capability supported by operational and site-level execution.

06

LOCAL TECHNICAL STRENGTH

An expanding Nigerian professional and operational workforce.

07

ADAPTABLE DELIVERY

Capability spanning specialist oilfield requirements and broader engineering, construction and infrastructure environments.
